Projects

AI Token Inspector | *JavaScript, Chrome Extension (Manifest V3), HTML, CSS, DOM APIs*

[GitHub](#)

- Developed a Chrome Extension (Manifest V3) that provides real-time token estimation, prompt analysis for AI platforms.
- Implemented client-side heuristic tokenization inspired by Byte Pair Encoding (BPE) and SentencePiece, achieving $\pm 3-5\%$ estimation accuracy without external API calls.
- Built a responsive UI using Shadow DOM and MutationObserver, enabling seamless integration across modern Single Page Applications (SPAs).
- Optimized performance using debounced event handling and local computation, maintaining sub-16 ms response time while ensuring user privacy by processing all data locally.

Nexus-Mind | *FastAPI, Next.js, PostgreSQL, Redis, XGBoost, Docker*

[GitHub](#)

- Developed an AI-powered mineral prospectivity mapping platform using FastAPI, PostgreSQL/PostGIS, and Next.js.
- Built an ensemble ML pipeline using CNN, XGBoost, and Random Forest models with explainable AI insights.
- Implemented geospatial analytics, secure authentication, and scalable REST APIs.
- Containerized the application with Docker and optimized ML processing using Celery and Redis.
